- 12 Palustris Experimental Forest
- 13 Kisatchie Hills Wilderness
- Uneven-aged Management
- Old-growth Forest
- Privately Owned Land
- Major Forest Roads
- Forest Proclamation Boundary

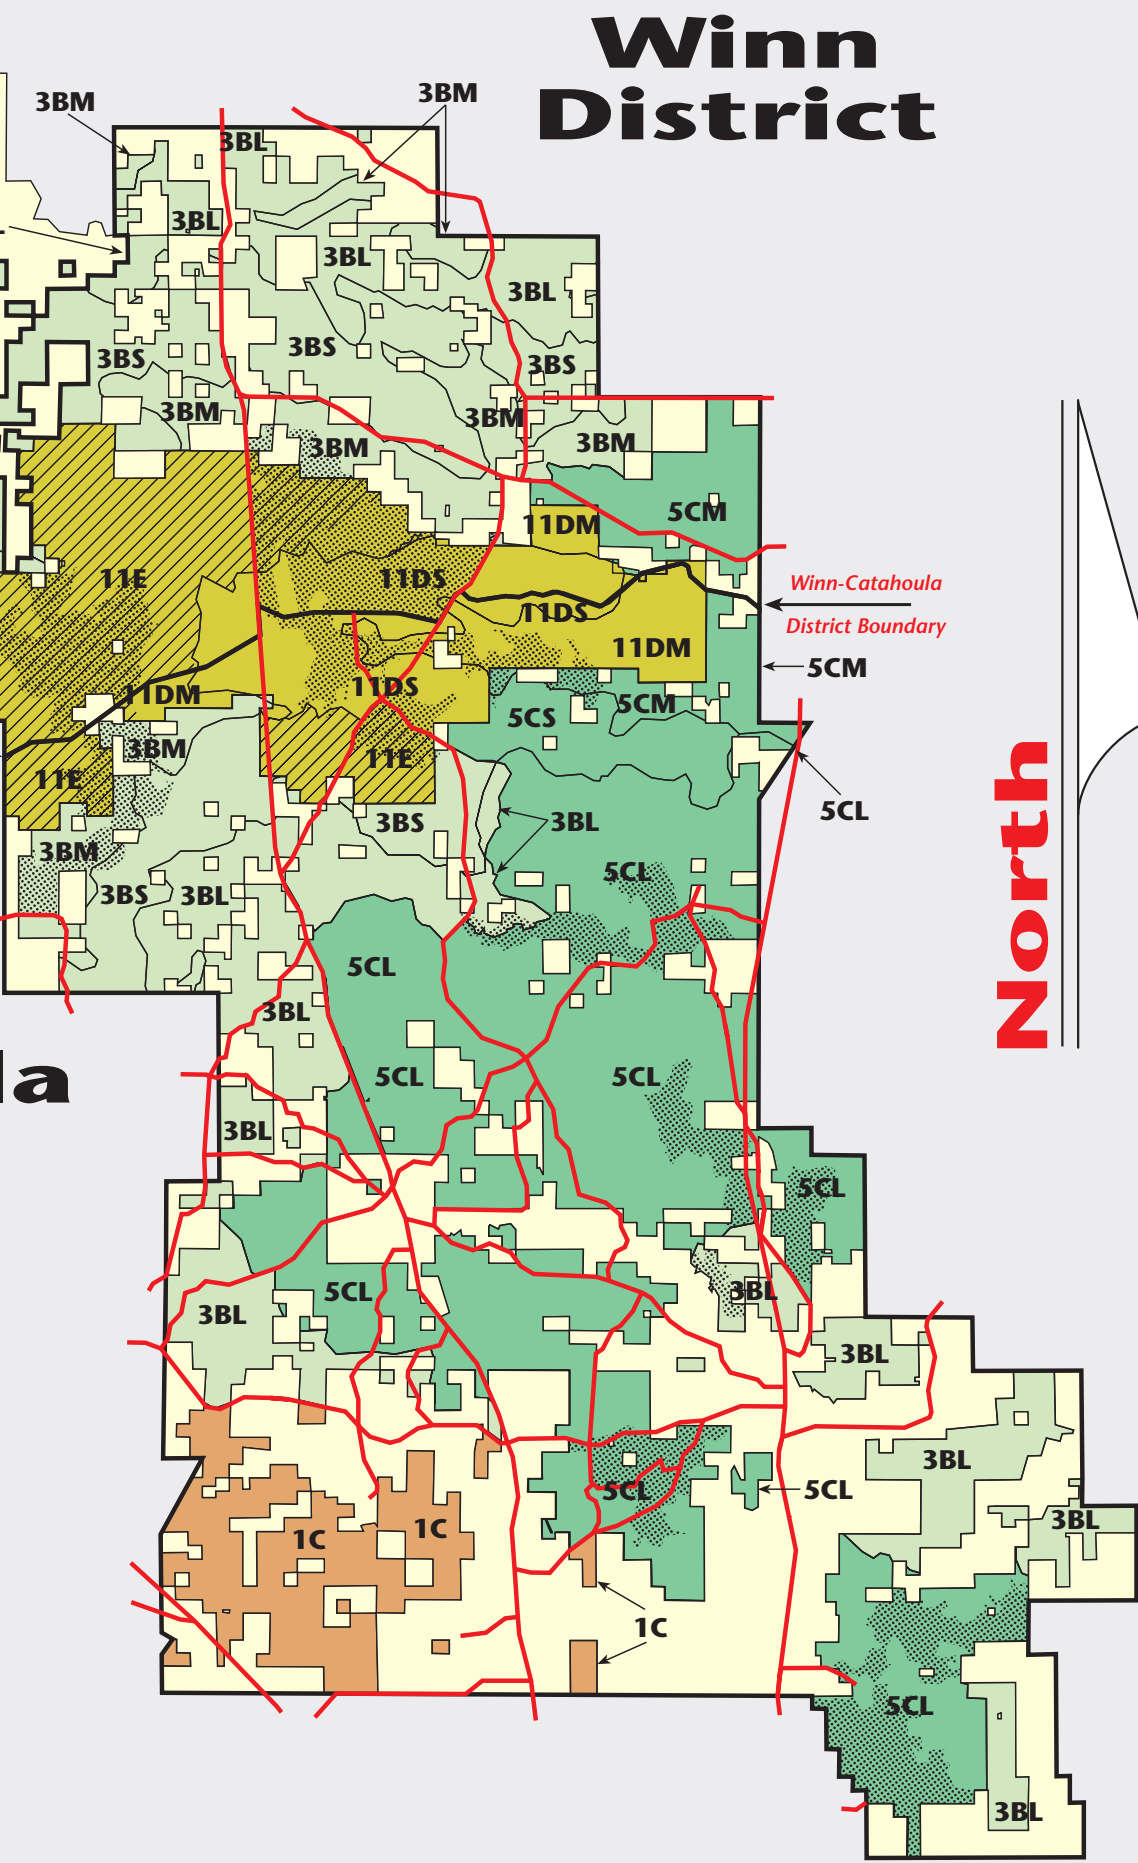

Management Areas Defined

The Kisatchie National Forest has been divided into numbered *management areas*, or MAs. The set of MAs, and the lands allocated to each, varies by alternative. Some of the MAs are further subdivided into *sub-management areas* (SMAs). When lettering follows map MA label numerals (example: 10EM), this indicates SMAs.

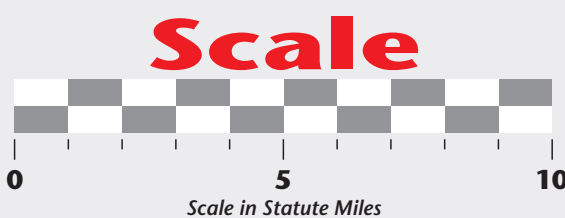

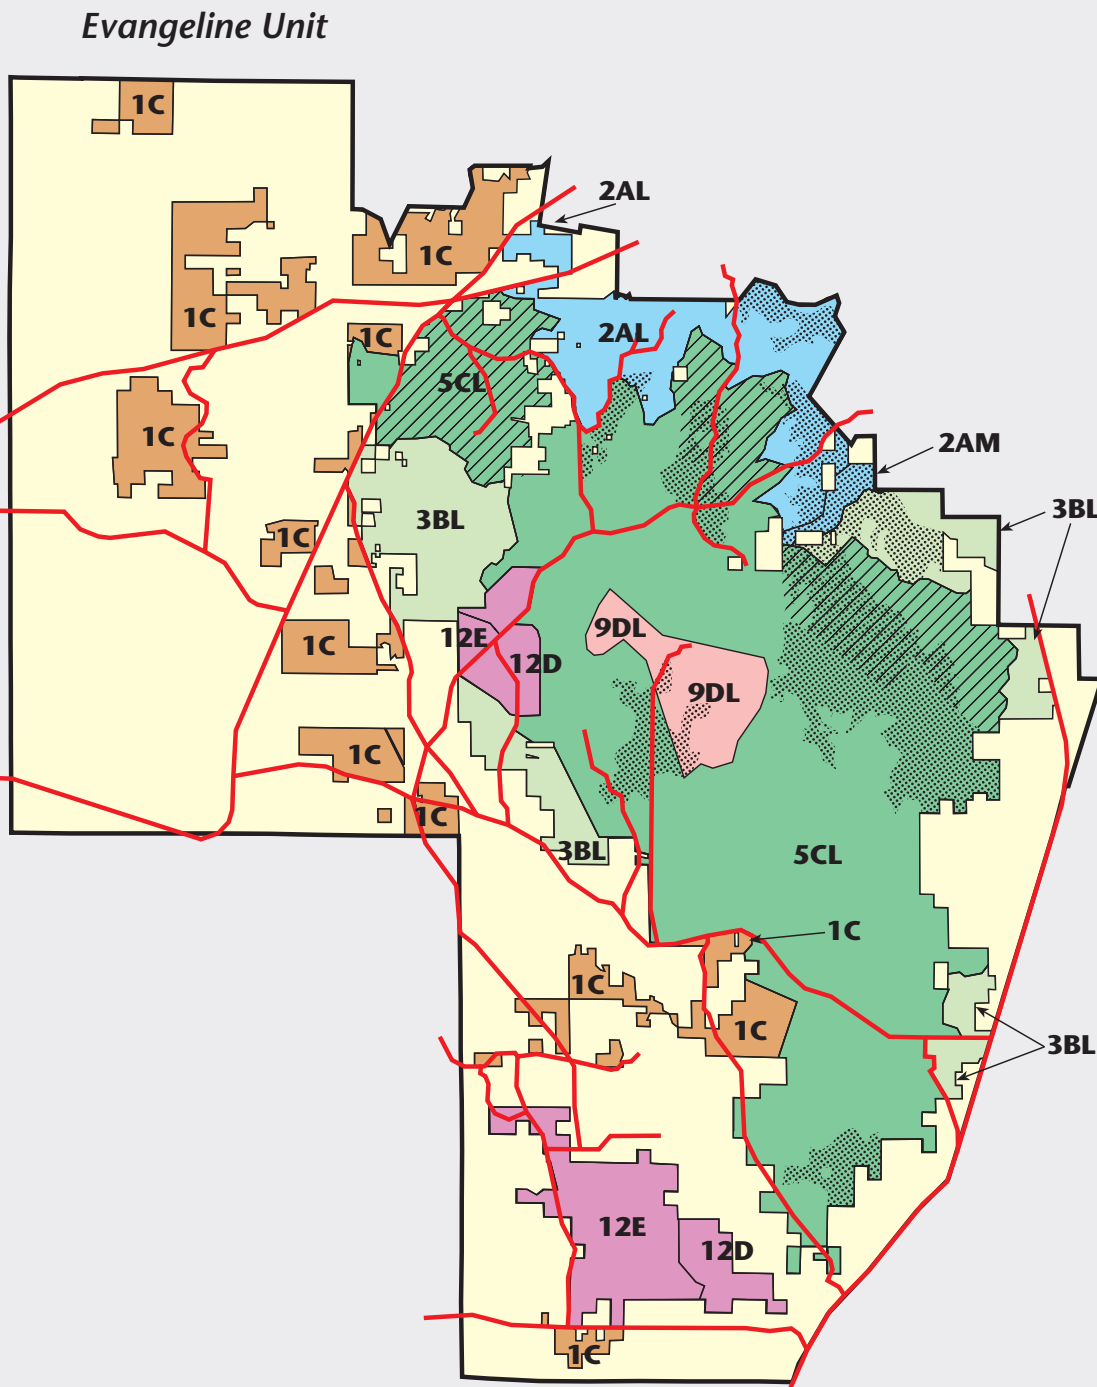

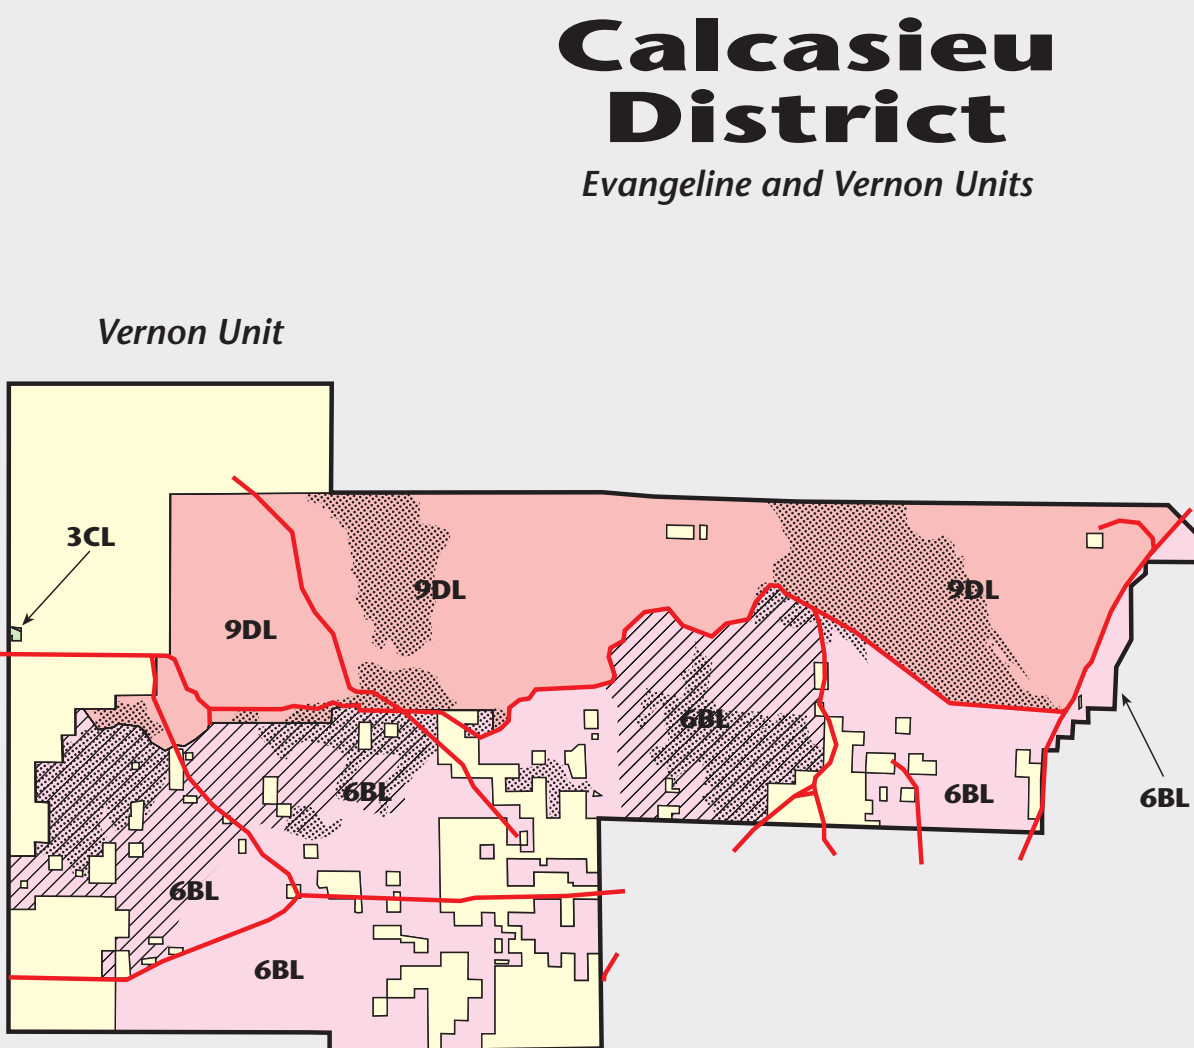

The Forest Plan details Forest-wide management requirements that apply to all MAs. Each MA and SMA is provided with additional specific direction designed to achieve stated objectives.

FOREST SERVICE MAP

This land management portrayal was electronically constructed at the Kisatchie National Forest headquarters office in Pineville, Louisiana in 1995 from digitized U.S. Geological Survey 7 1/2 quadrangle maps. The detailed information in this presentation is the result of further digitizing and arrangement by the Geographic Information Systems Department in 1995 and 1996. Also in 1996, preparatory to lithographic reproduction, it was enhanced for output to negative film by the Public Affairs Office.
